BACKGROUND INFORMATION OF RANCHI DISTRICT

1. Area :-

Ranchi is one of the oldest district of undivided Bihar, with the formation of new Jharkhand state it has assumed greater importance as the state capital. It has a geographical area of 7,59,250 hectare.

2. Agro climatic condition:-

The district may be divided in two plateaus. The first plateau comprising greater Part of the district includes nearly the whole of sadar sub-division and western part of Khunti district. The second and the lower plateaus consists of the extreme eastern and the southern portion the district.

The mean daily maximum and minimum temperature varies between 29°C and 18°C respectively. The average annual rainfall is about 1100 mm, post monsoon is 98mm., winter rain is 65mm and premonsoon is 121 mm.

The boundary of Ranchi district is as follows. South-Khunti, North-Ramgarh and Chhatra, East-West Bengal. and Saraikela, West-Palamu, Lohardaga and Gumla..

The district is characterised by undulating topography. Its soil is red, yellow, Light grey and acidic in nature.

3. Populations:-

The district has a population of 27,83,577 out of which rural population is 72.13%.The tribe populations accounting of 45.78% and scheduled caste about 5.3%.Literacy is about 65.69% of the rural populations 57.16% is tribal populations.

4.Land Use Pattern:-

The total geographical area of the district is 7,598,250 Hect. Net area shown is 276091 hectrs. Area under double crop is 6%.The forest cover is about 18% of the total geographical area. Mono cropping is the mainstay due to inadequate development of irrigation. Now of course it is set to follow a different trend slowly. Out of total operational holding of 244,013 in the district 72% are owned by small and marginal farmers accounting 24% of the total geographical area. 48% of the small and marginal farmer belongs to tribal community. The average size of holding of small and marginal farmers is 0.62 hectare.

5. Operational Holding:-

6. River System :-

Subernarekha and koel are the principal rivers in the district. Only 24% of ground water resources is utilized whereas there is huge untapped ground water potential .Similarly the surface water is plenty. It needs proper planning for the creation and efficient utilization for increasing the irrigated area and agriculture production. specially the second crop (Rabi).

7. Agricultural overview:-

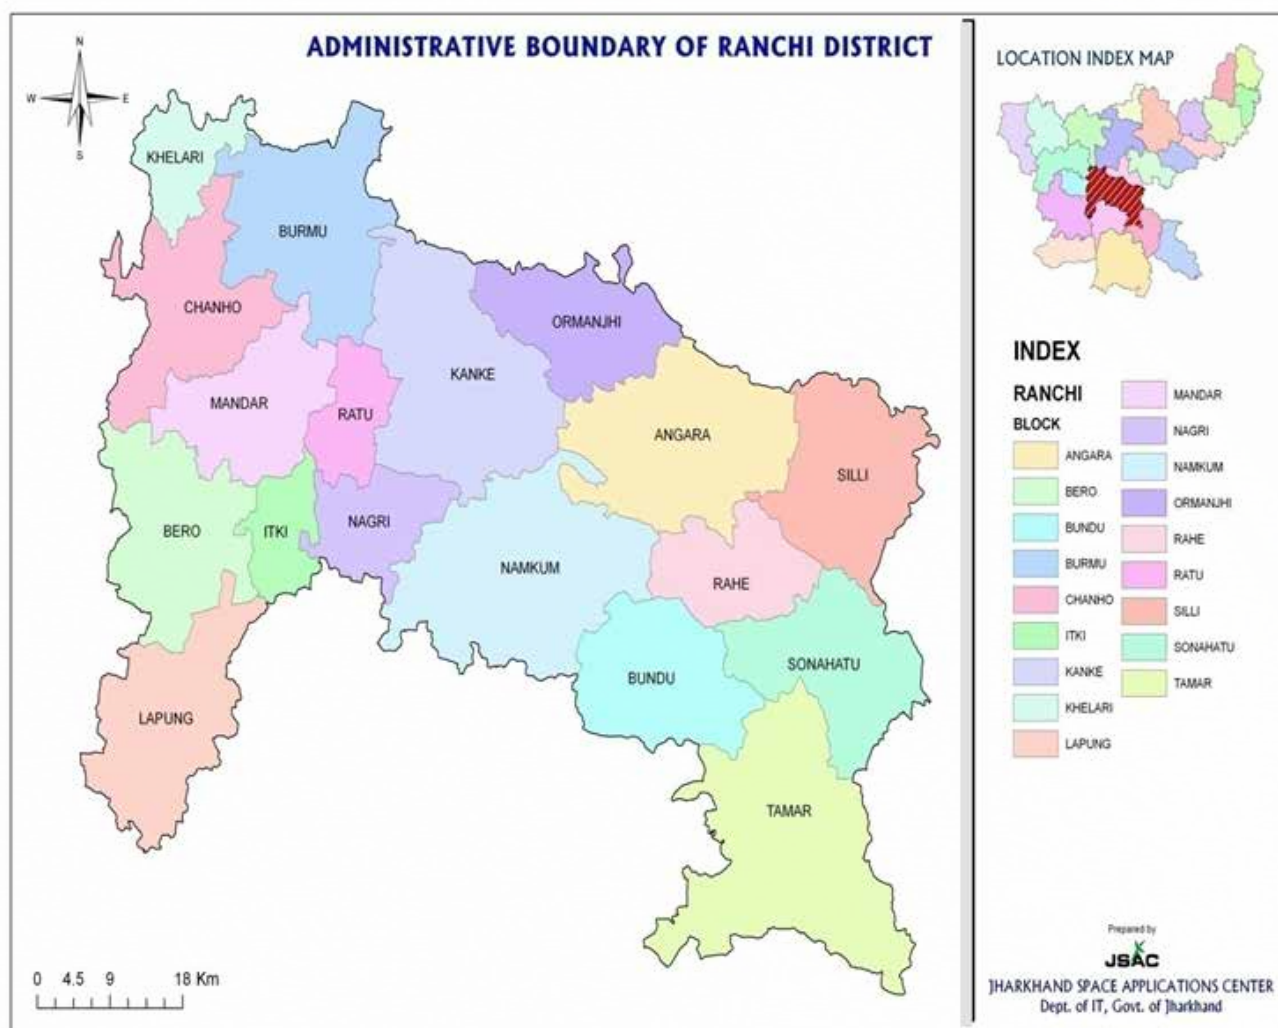

The mainstay of the district is agriculture and allied activities and 80% of the inhabitants depend on agriculture for main livelihoods. Practically all the cultivated area is mono cropped and rainfed. The major reasons for poor productivity are lack of availability of high yielding seed, lack of scientific inputs and improved equipment and lack of agricultural credit. The Major crops grown in this district are Rice, Pulses, Oilseeds and vegetables.

BASIC APPROACH

1. Income and work security of rural families both with on farm and off farm opportunities, land less labour to be included.
 2. Instead of single intervention like high yielding variety or fertilizer application adopt a farming system/ Cropping system approach with crop/Live stock integration.
 3. Conservation Farming with emphasis and natural resource conservation and enhancement including soil, water bio resources.
 4. Rain water harvesting.
 5. Bio industrial watershed development.
 6. Convert single crop to double crop zones introduce, crop rotation involving legumes, agro forestry, Bamboo.
 7. Care fully select and introduce appropriate new technologies.
 8. Set up pilot plots for demonstration and training.
- a. **Rice :-** SRI (System of rice intensification) linked to HYV, Hybrid Rice (Where appropriate)
- b. **Maize :-** Quality protein maize (QPM), Linked to poultry farming and nutritional intervention.
- c. **Soybean :-** Upland rotation.
- d. High value tuber crops like flesh sweet potato.
 - e. Women friendly farm implements.
 - f. Rural godown and warehouses to store seed and planting material.
 - h. Cold Storages for perishable produce.
 - i. The crop cycle should be planned to accommodate their requirement in a phase manner.
- Crop needed for home consumption
 - Crop that can be marketed, organic crop.
 - Crop with export potential like fruits & elite vegetables, spices.

Agricultural Support :-

The farmers use traditional methods and implements for farming which results in low yield. The state government is supplying improved farming tools like sprayers, power tiller, conoweeder for (SRI) zero tillage, pumpsets 5 HP & 3 HP, Seed Drum for transplanting seeds and other implements to poor farmers at highly subsidized rates.
